COLLEGE OF ENGINEERING
VIJAYAMANGALAM

OBJECTIVE:

- To give an overview about the highway engineering with respect to, planning, design, construction and maintenance of highways as per IRC standards, specifications and methods.

UNIT I	HIGHWAY PLANNING AND ALIGNMENT	9
Significance of highway planning - Modal limitations towards sustainability - History of road development in India - factors influencing highway alignment - Soil suitability analysis - Road ecology - Engineering surveys for alignment, objectives, conventional and modern methods - Classification of highways - Locations and functions - Typical cross sections of Urban and Rural roads		
UNIT II	GEOMETRIC DESIGN OF HIGHWAYS	9
Cross sectional elements - Sight distances - Horizontal curves, Super elevation, transition curves, widening at curves - Vertical curves - Gradients, Special consideration for hill roads - Hairpin bends - Lateral and vertical clearance at underpasses.		
UNIT III	DESIGN OF FLEXIBLE AND RIGID PAVEMENTS	9
Pavement components and their role - Design principles - Design practice for flexible and rigid Pavements (IRC methods only) - Embankments- Problems in Flexible pavement design.		
UNIT IV	HIGHWAY CONSTRUCTION MATERIALS AND PRACTICE	9
Highway construction materials, properties, testing methods - CBR Test for subgrade - tests on aggregate & bitumen - Test on Bituminous mixes-Construction practice including modern materials and methods, Bituminous and Concrete road construction, Polymer modified bitumen, Recycling, Different materials - Glass, Fiber, Plastic, Geo-Textiles, Geo-Membrane (problem not included) - Quality control measures - Highway drainage - Construction machineries.		
UNIT V	EVALUATION AND MAINTENANCE OF PAVEMENTS	9
Pavement distress in flexible and rigid pavements - Types of maintenance - Pavement Management Systems - Pavement evaluation, roughness, present serviceability index, skid resistance, structural evaluation, evaluation by deflection measurements - Strengthening of pavements - Highway Project formulation.		
		TOTAL: 45 PERIODS

OUTCOMES:

Students will be able to

- Get knowledge on planning and aligning of highway.
- Geometric design of highways
- Design flexible and rigid pavements.
- Gain knowledge on Highway construction materials, properties, testing methods
- Understand the concept of pavement management system, evaluation of distress and maintenance of pavements.
