### Outcome of Research Methodology Programme

At the end of the Research Methodology Programme, Students can be able to

- Gain a comprehensive understanding of disaster management principles, including disaster types, risk assessment, mitigation strategies, response planning, and recovery efforts.
- Learn how to design research studies in disaster management, including formulating research questions, selecting appropriate methodologies, and developing data collection and analysis plans.
- Explore early warning systems for natural and man-made disasters, including seismic monitoring, weather forecasting, flood forecasting for disseminating warnings and alerts.
- Learn techniques for engaging stakeholders in disaster management research, including community consultations, participatory mapping and collaborative decision-making processes.
- Analyze case studies of past disasters, including successes and failures in disaster management and preparedness, to identify lessons learned, best practices, and areas for improvement.
